JOURNAL OF MOLECULAR RECOGNITION (*J. Mol. Recogn.*)

CONTENTS

Volume 11 Number 1–6 1998

EDITORIAL
Affinity interactions
S. Ohlson and B. Mattiasson 1

Poliovirus and its cellular receptor: a molecular genetic dissection of a virus/receptor affinity interaction
D. Solecki, M. Gromeier, J. Harber, G. Bernhardt and E. Wimmer 2

Thermodynamic characterization of affinity maturation: the D1.3 antibody and a higher-affinity mutant
J. J. VanAntwerp and K. D. Wittrup 10

Interactions of calmodulin with metal ions and with its target proteins revealed by conformation-sensitive monoclonal antibodies
T. Wolf, B. Solomon, D. Ivnitski, J. Rishpon and G. Fleminger 14

A citrate-binding site in calmodulin
T. Neufeld, M. Eisenstein, K. A. Muszkat and G. Fleminger 20

Reactivation of glyceraldehyde-3-phosphate dehydrogenase using conjugates of monoclonal antibodies with polyelectrolyte complexes. An attempt to make an artificial chaperone
M. B. Dainiak, V. A. Izumrudov, V. I. Muronetz, I. Y. Galaev and B. Mattiasson 25

Prediction of molecular recognition-enhanced phenobarbital extraction based on solvatochromic analysis
L. Sun and S. G. Weber 28

Histidine mapping of serine protease: a synergic study by IMAC and molecular modelling
V. Boden, M. H. Rangeard, N. Mrabet and M. A. Vijayalakshmi 32

Sjögren's autoimmunity: how perturbation of recognition in endomembrane traffic may provoke pathological recognition at the cell surface
A. K. Mircheff, J. P. Gierow, T. Yang, J. Zhang, R. L. Wood, A. M. Azzarolo, D. W. Warren, H. Zeng, Z. Guo, H. R. Kaslow, S. F. Hamm-Alvarez, C. T. Okamoto and M. Bachmann 40

Recombinant soluble low-density lipoprotein receptor fragment inhibits common cold infection
T. C. Marlovits, T. Zechmeister, H. Schwihla, B. Ronacher and D. Blaas 49

Freeze-thaw immobilization of liposomes in chromatographic gel beads: evaluation by confocal microscopy and effects of freezing rate
A. Lundqvist, G. Ocklind, L. Haneskog and P. Lundahl 52

Biomembrane affinity chromatographic analysis of nitrobenzylthioinosine binding to the reconstituted human red cell nucleoside transporter
L. Haneskog, A. Lundqvist and P. Lundahl 58

Some new developments and challenges in non-covalent molecular imprinting technology
K. Mosbach and K. Haupt 62

JMORE4 11(1–6) 1–284 (1998)
ISSN 0952–3499

Contents continued

Insights into the origins of binding and the recognition properties of molecularly imprinted polymers prepared using an amide as the hydrogen-bonding functional group
C. Yu and K. Mosbach 69

A new application of molecularly imprinted materials
L. Ye, O. Ramström, M.-O. Månsson and K. Mosbach 75

Towards the rational design of molecularly imprinted polymers
I. A. Nicholls 79

Spectroscopic studies of the molecular imprinting self-assembly process
J. Svenson, H. S. Andersson, S. A. Piletsky and I. A. Nicholls 83

Novel chiral recognition elements for molecularly imprinted polymer preparation
M. Knutsson, H. S. Andersson and I. A. Nicholls 87

Phage viability in organic media: insights into phage stability
L. Olofsson, J. Ankarloo and I. A. Nicholls 91

The rational use of hydrophobic effect-based recognition in molecularly imprinted polymers
S. A. Piletsky, H. S. Andersson and I. A. Nicholls 94

Theophylline molecularly imprinted polymer dissociation kinetics: a novel sustained release drug dosage mechanism
M. C. Norell, H. S. Andersson and I. A. Nicholls 98

Crown-ethers as a tool for the preparation of molecularly imprinted polymers
H. S. Andersson and O. Ramström 103

IRIS 97: an innovative protein A-peptidomimetic solid phase media for antibody purification
L. Guerrier, I. Flayeux, A. Schwartz, G. Fassina and E. Boschetti 107

Use of weak monoclonal antibodies for affinity chromatography
M. Bergström, A. Lundblad, P. Påhlsson and S. Ohlson 110

Screening for weak monoclonal antibodies in hybridoma technology
L. Leickt, A. Grubb and S. Ohlson 114

Affinity of recombinant antibody and antibody fragment binding to human thyroglobulin: potential applications in gene therapy
J.-C. Mani, D. Noel, M. Marin, I. Navarro-Teulon, M. Baird-Piechaczyk, B. Pau and M. Piechaczyk 117

Structure of the IgG-binding ligand of the T-gel
J. A. Scoble and R. K. Scopes 119

Identification of peptides that bond to the constant region of a humanized IgG_1 monoclonal antibody using phage display
G. K. Ehrlich and P. Bailon 121

Making antibody and peptide ligands by repertoire selection technologies
G. Winter 126

Immunoglobulins specificity of TG19318: a novel synthetic ligand for antibody affinity purification
G. Fassina, A. Verdoliva, G. Palombo, M. Ruvo and G. Cassani 128

Capillary affinophoresis as a versatile tool for the studies of biomolecular interaction: a mini-review
K. Shimura and K. Kasai 134

Capillary electrophoresis for the study of affinity interactions
N. H. H. Heegaard 141

Application of multichannel flow electrophoresis to separation of biomolecules: a survey
Z. Liu, J. Wang, J. Luo, F. Ding and N. Yuan 149

Electrophoretic affinity chromatography: method validation
Z. Liu, S. Feng, S. Guo, Z. Shen, F. Ding and N. Yuan 151

Hyphenated thermal field flow fractionation—capillary electrophoresis
S. N. Semenov 157

Measurement of antigen-antibody interactions with biosensors
M. H. V. Van Regenmortel, D. Altschuh, J. Chatellier, L. Christensen, N. Rauffer-Bruyère, P. Richalet-Secordel, J. Witz and G. Zeder-Lutz 163

A holographic sensor based on a rationally designed synthetic polymer
A. G. Mayes, J. Blyth, R. B. Millington and C. R. Lowe 168

Development of a capacitive immunosensor: a comparison of monoclonal and polyclonal capture antibodies as the primary layer
H. C. Berney, J. Alderman, W. A. Lane and J. K. Collins 175

Electrochemical immunosensor for the detection of atrazine
M. A. López, F. Ortega, E. Domínguez and I. Katakis 178

A flow immunoassay for studies of human exposure and toxicity in biological samples
P. Önnerfjord, S. A. Eremin, J. Emnéus and G. Marko-Varga 182

Immunoreagents based on polymer dispersions for immunochemical assays
Y. V. Lukin, I. S. Pavlova, A. N. Generalova, V. P. Zubov, O. V. Zhorov and S. P. Martsev 185

Studies of interactions with weak affinities and low-molecular-weight compounds using surface plasmon resonance technology
M. Strandh, B. Persson, H. Roos and S. Ohlson 188

Detection of low-molecular-weight heparin oligosaccharides (Fragmin™) using surface plasmon resonance
M. Liljeblad, A. Lundblad, S. Ohlson and P. Påhlsson 191

New approaches for the analysis of molecular recognition using the IAsys evanescent wave biosensor
P. A. Lowe, T. J. H. A. Clark, R. J. Davies, P. R. Edwards, T. Kinning and D. Yeung 194

High-density immobilization of an antibody fragment to a carboxymethylated dextran-linked biosensor surface
S. Howell, M. Kirkland and R. A. Badley 200

Thermodynamic analysis of protein interactions with biosensor technology
H. Roos, R. Karlsson, H. Nilshans and A. Persson 204

Affinity precipitation of proteins: design criteria for an efficient polymer
B. Mattiasson, A. Kumar and I. Y. Galaev 211

The use of affinity adsorbents in expanded bed adsorption
H. Allaker Chase 217

Selective adsorption of endotoxin inside a polycationic network of flat-sheet microfiltration membranes
D. Petsch, E. Rantze and F. B. Anspach 222

Affinity-based *in situ* product removal coupled with co-immobilization of oily substrate and filamentous fungus
A. Dukler and A. Freeman 231

Affinity precipitation of concanavalin A—Studies of some underlying mechanisms using dynamic laser light scattering
E. Linné Larsson, I. Y. Galaev and B. Mattiasson 236

Preliminary studies on the purification of a monoclonal antibody by affinity precipitation with Eudragit S-100
M. A. Taipa, R. Kaul, B. Mattiasson and J. M. S. Cabral 240

A synthetic ligand for IgA affinity purification
G. Palombo, S. De Falco, M. Tortora, G. Cassani and G. Fassina 243

Affinity purification of mouse monoclonal IgE using a protein A mimetic ligand [TG19318] immobilized on solid supports
G. Palombo, M. Rossi, G. Cassani and G. Fassina 247

Purification of supercoiled plasmid DNA using chromatographic processes
G. N. M. Ferreira, J. M. S. Cabral and D. M. F. Prazeres 250

Preliminary studies on continuous recovery and purification of the penicillin acylase under pseudo-affinity conditions using phenyl-Sepharose gel
L. J. P. Fonseca, I. M. Patricio and J. M. S. Cabral 252

Protein displacement in dye-ligand chromatography using neutral and charged polymers
I. Y. Galaev, P. Arvidsson and B. Mattiasson 255

Unusual protein binding specificity and capacity of aza-arenophilic gels
S. Jogie, D. Narinesingh and T. T. Ngo 261

Cellulose powder for *Cladophora* sp. algae
R. Ek, C. Gustafsson, A. Nutt, T. Iversen and C. Nyström 263

Purification of substance P endopeptidase (SPE) activity in human spinal cord and subsequent comparative studies with SPE in cerebrospinal fluid and with chymotrypsin
K. Karlsson and F. Nyberg 266

Direct measurement of intraparticle fluid velocity in superporous agarose beads
P.-O. Larsson, P.-E. Gustavsson and A. Axelsson 270

Preparation and optimal module housings for hollow fibre membrane ion exchangers
E. Müller and U. Baurmeister 273
